Usage Notice

Safety Instructions

Read all of these instructions before you operate your projector and save for future reference.

1. Read instructions

All the safety and operating instructions should be read before the appliance is operated.

2. Notes and warnings

All notes and warnings in the operating instructions should be adhered to.

3. Cleaning

Unplug the projector from the wall socket before cleaning. Use a damp cloth for cleaning the projector housing. Do not use liquid or aerosol cleaners.

Accessories

Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.

Keep the plastic packing materials (from the projector, accessories and optional parts) out of the reach of children as these bags may result in death by suffocation. Be particularly careful around the small children.

Ventilation

The projector is equipped with ventilation holes (intake) and ventilation holes (exhaust). Do not block or place anything near these slots, or internal heat build-up may occur, causing picture degradation or damage to the projector.

Power sources

Check that the operating voltage of your unit is identical with the voltage of your local power supply.

7. Servicing

Do not attempt to service this projector yourself. Refer all servicing to qualified service personnel.

8. Replacement parts

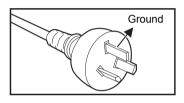

When replacement parts are required, be sure that the replacement parts are specified by the manufacture. Unauthorized substitutions may result in fire, electric shock or other hazards.

9. Moisture Condensation

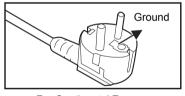

Never operate this projector immediately after moving it from a cold location to a warm one. When the projector is exposed to such a change in temperature, moisture may condense on the lens and the crucial internal parts. To prevent the unit from possible damage, do not use the projector for at least 2 hours when there is an extreme or sudden change in temperature.

Notes on the AC Power Cord

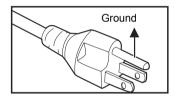

AC Power Cord must meet the requirement of countries where you use this projector. Please confirm your AC plug type with the graphics below and ensure that the proper AC Power Cord is used. If the supplied AC Power Cord does not match your AC outlet, please contact your sales dealer. This projector is equipped with a grounding type AC line plug. Please ensure that your outlet fits the plug. Do not defeat the safety purpose of this grounding type plug. We highly recommend using a video source device also equipped with a grounding type AC line plug to prevent signal interference due to voltage fluctuations.

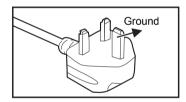

For Australia and Mainland China

For Continental Europe

For the U.S.A. and Canada

For the U.K.

Introduction

Projector Features

The projector integrates high-performance optical engine projection and a user - friendly design to deliver high reliability and ease of use.

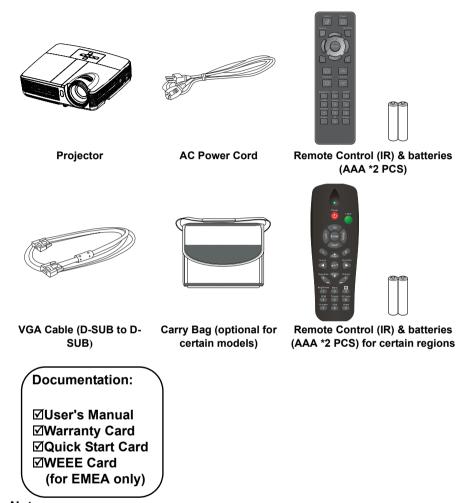

The projector offers the following features:

- Single chip 0.55" Texas Instruments DLP® technology
- SVGA (800 x 600 pixels)
- XGA (1024 x 768 pixels)
- Compatibility with Macintosh® computers
- Compatibility with NTSC, PAL, SECAM and HDTV
- D-Sub 15-pin terminal for analog video connectivity
- User-friendly, multi-language on-screen display
- Advanced electronic keystone correction
- RS-232 connector for serial control

- The information in this manual is subject to change without notices.
- The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Package Contents

When you unpack the projector, make sure you have all these components:

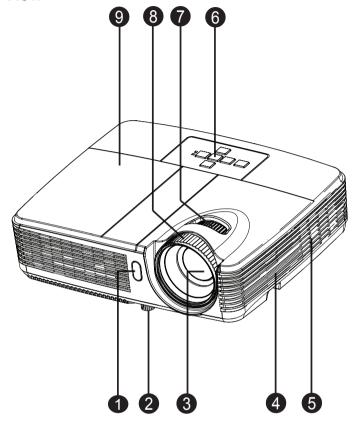

Note

- For European warrant information please visit www.optomaeurope.com
- Due to the difference in applications for each country, some regions may have different accessories.
- Contact you dealer immediately if any items are missing, appear damaged, or if the unit does not work.
- Save the original shipping carton and Packing material; they will come-in handy if you ever to ship your unit. for maximum protection, repack your unit as it was originally packed at the factory.

EN-6

Projector Overview

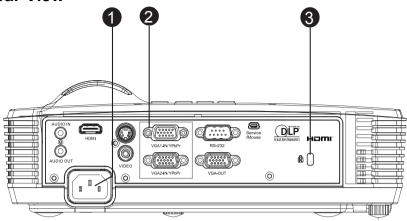

Front View

- Front IR remote control sensor
- Elevator foot
- Projection lens
- Speaker
- Ventilation holes

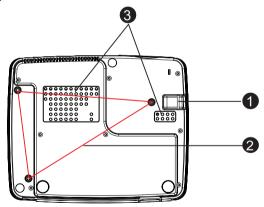

- 6 Control panel
- Zoom ring
- Focus ring
- Lamp cover

Rear View

- AC power socket
- Connection ports (HDMI is only on certain models)
- Kensington lock

Bottom View

- Security bar
- Ceiling mount holes
- Ventilation holes

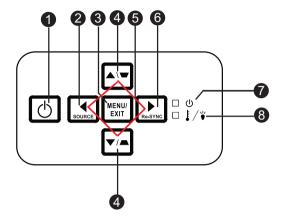

Note

- This projector can be used with a ceiling mount for support. The ceiling mount is not included in the package.
- Contact your dealer for information to mount the projector on a ceiling.

EN-8

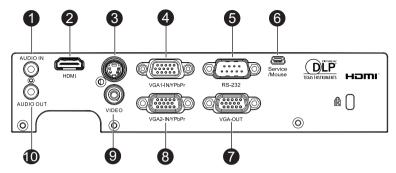

Using the Product

Control Panel

- **Power**Turn the projector on or off.
- SOURCE Switch between input signals.
- MENU/EXIT
 Display or exit the on-screen display menus.
- Keystone (▼/▲)
 Manually correct distorted images resulting from an angled projection.
- Four directional buttons
 Use four directional buttons to select items or make adjustments to your selection.
- Re-SYNC Automatically synchronize the projector to the input source.
- POWER (Power LED indicator) Refer to "LED Indicator Messages".
- TEMP/LAMP (Temp/Lamp LED indicator) Refer to "LED Indicator Messages".

Connection Ports

AUDIO IN

Connect an audio output from video equipment or computer to this jack.

HDMI (HDMI is only on certain models)
Connect HDMI output from video equipment to this jack.

S-VIDEO

Connect S-Video output from video equipment to this jack.

VGA1-IN/YPbPr

Connect image input signal (analog RGB or component) to this jack.

a RS-232

When operating the projector via a computer, connect this to the controlling computer's RS-232C port.

Service/Mouse

This connector is for firmware update and mouse function support.

VGA OUT

Connect to a computer display, etc.

O VGA2-IN/YPbPr

Connect image input signal (analog RGB or component) to this jack.

VIDEO

Connect composite video output from video equipment to this jack.

@ AUDIO OUT

Connect to a speaker or other audio input equipment.

Remote Control

Switch

Switch to mouse mode when the on-screen menus are close.

Source

Switch between input signals.

Four directional buttons

Use four directional buttons to select items or make adjustments to your selection.

A Left mouse

Perform the left button of the mouse when mouse mode is activated.

6 Keystone (△/▽)

Manually correct distorted images resulting from an angled projection.

Brightness

Display the setting bar for adjustment of brightness.

Freeze

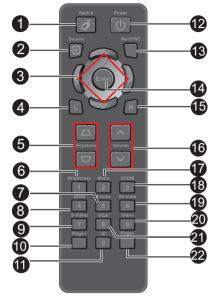

Freeze the projected image.

HDMI

Display HDMI signal. (This function will not work if product does not have HDMI)

S-Video

Display S-Video signal.

Page+

Perform page up function when mouse mode is activated.

10 3D

Turn on or off 3D function.

Power

Turn the projector on or off.

® Re-SYNC

Automatically synchronize the projector to the input source.

Enter

Confirmed selections.

Right mouse

Perform the right button of the mouse when mouse mode is activated.

Volume (∧/∨) Adjust the volume level.

Menu

Display on-screen display menus.

® ZOOM

Magnifies or reduces the projected picture size.

AV mute

Cut off the AV Mute temporarily. Only pressing AV Mute again can output sound and image. If any other buttons are pressed, the projection image will become abnormal and no sound will be output.

Video Display video signal.

VGA

Switch input source to VGA1 or VGA2 by sequence.

Page-

Perform page down function when mouse mode is activated.

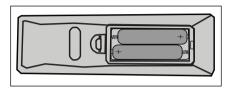

Using the remote mouse control

The capability of operating your computer with the remote control gives you more flexibility when delivering presentations.

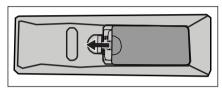

- Connect the projector to your PC or notebook with a USB cable prior to using the remote control in place of your computer's mouse. See "Connecting a computer" on page 16 for details.
- Set the input signal to VGA1 or VGA2
- Press Switch on the remote control to switch to mouse mode when the on-screen menus are close. An icon appears on the screen to indicate the activation of the mouse mode.
- Perform the desired mouse controls on your remote control.
 - To move the cursor on the screen, press \(\Delta / \Delta / \Delta / \Delta \).
 - To left-click, press L.
 - To right-click, press **R**.
 - To return to the normal mode, press **Switch** again.

Installing the Batteries

- Open the battery cover in the direction shown.
- Install batteries as indicated by the diagram inside the compartment.

3. Close the battery cover into position.

Caution

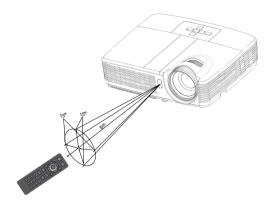

- ■Risk of explosion if battery is replaced by an incorrect type.
- ■Dispose of used batteries according to the instructions.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.

- Keep the batteries out of the reach of children. There is a danger of death by accidentally swallowing the batteries.
- Remove batteries from remote control when not using for extended periods.
- Do not dispose of the used batteries along with household waste. Dispose of used batteries according to local regulations.
- Danger of explosion may happen if batteries are incorrectly replaced. Replice all the batteries with new ones.
- Batteries should not be in or near to fire or water, keep batteries in a dark, cool and dry place.
- If suspect battery leakage, wipe out the leakage and then replace new batteries. If the leakage adheres to your body or clothes, rinse well with water immediately.

Remote Control Operation

Point the remote control at the infrared remote sensor and press a button.

Operating the projector from the front

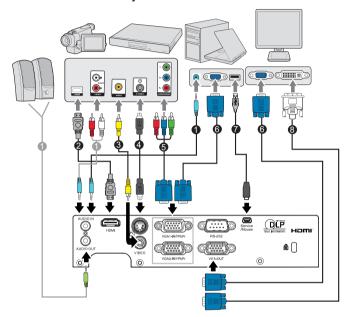

- The remote control may not operate when there is sunlight or other strong light such as a fluorescent lamp shining on the remote sensor.
- Operate the remote control from a position where the remote sensor is visible.
- Do not drop the remote control or jolt it.
 Keep the remote control out of locations with excessively high temperature or humidity.
- Do not get water on the remote control or place wet objects on it.
- Do not disassemble the remote control.

Connection

When connecting a signal source to the projector, be sure to:

- 1. Turn all equipment off before making any connections.
- 2. Use the correct signal cables for each source.
- 3. Ensure the cables are firmly inserted.

1.	*Audio cable
2.	*HDMI cable
3.	*Composite Video cable
4.	*S-Video cable
5.	*VGA (D-Sub) to HDTV (RCA) cable
6.	VGA cable (D-Sub to D-Sub)
7.	*USB cable
	*VGA to DVI-A cable

- Due to the difference in applications for each country, some regions may have different accessories.
- (*) Optional Accessory

Connecting a computer or monitor

Connecting a computer

The projector provides two VGA input sockets that allow you to connect them to both IBM® compatibles and Macintosh® computers. A Mac adapter is needed if you are connecting legacy version Macintosh computers.

To connect the projector to a notebook or desktop computer:

- 1. Take the supplied VGA cable and connect one end to the D-Sub output socket of the computer.
- Connect the other end of the VGA cable to the VGA1-IN/YPbPr or VGA2-IN/YPbPr signal input socket on the projector.

■ Many notebooks do not turn on their external video ports when connected to a projector. Usually a key combo like FN + F3 or CRT/LCD key turns the external display on/off. Locate a function key labeled CRT/LCD or a function key with a monitor symbol on the notebook. Press FN and the labeled function key simultaneously. Refer to your notebook's documentation to find your notebook's key combination

Connecting a monitor

If you want to view your presentation close-up on a monitor as well as on the screen, you can connect the **VGA OUT** signal output socket on the projector to an external monitor with a VGA cable following the instructions below:

To connect the projector to a monitor:

- 1. Connect the projector to a computer as described in "Connecting a computer" on page 16.
- Take a suitable VGA cable (only one supplied) and connect one end of the cable to the D-Sub input socket of the video monitor.
 Or if your monitor is equipped with a DVI input socket, take a VGA to DVI-A cable and connect the DVI end of the cable to the DVI input socket of the video monitor.
- Connect the other end of the cable to the VGA OUT socket on the projector.

■ The VGA OUT output only works when VGA1-IN/YPbPr or VGA2-IN/ YPbPr is made to the projector.

Connecting Video source devices

You can connect your projector to various Video source devices that provide any one of the following output sockets:

- HDMI
- Component Video
- S-Video
- Video (composite)

You need only connect the projector to a Video source device using just one of the above connecting methods, however each provides a different level of video quality. The method you choose will most likely depend upon the availability of matching terminals on both the projector and the Video source device as described below:

Terminal name	Terminal appearance	Reference	Picture quality
HDMI	HDMI	"Connecting an	Best
		HDMI source	
	<u> </u>	device" on	
		page 18	
Component	VGA1-IN/YPbPr or	"Connecting a	Better
Video	VGA2-IN/YPbPr	Component Video	
		source device" on	
		page 18	
S-Video	S-VIDEO	"Connecting an	Good
	(: - :)	S-Video source	
		device" on	
		page 19	
Video	VIDEO	"Connecting a	Normal
		composite Video	
		source device" on	
		page 20	

Note

■ Not all models have HDMI input jack, please check your projector before connecting

Connecting an HDMI source device

Examine your Video source device to determine if it has a set of unused HDMI output jacks available:

- If so, you can continue with this procedure.
- If not, you will need to reassess which method you can use to connect to the device.

To connect the projector to an HDMI source device:

- Take an HDMI cable and connect one end to the HDMI output jack of the HDMI source device.
- 2. Connect the other end of the HDMI cable to the **HDMI** jack on the projector.

Connecting a Component Video source device

Examine your Video source device to determine if it has a set of unused Component Video output sockets available:

- If so, you can continue with this procedure.
- If not, you will need to reassess which method you can use to connect to the device.

To connect the projector to a Component Video source device:

- Take a VGA (D-Sub) to HDTV (RCA) cable and connect the end with 3 RCA type connectors to the Component Video output sockets of the Video source device. Match the color of the plugs to the color of the sockets: green to green, blue to blue, and red to red.
- 2. Connect the other end of the cable (with a D-Sub type connector) to the **VGA1-IN/YPbPr** or **VGA2-IN/YPbPr** socket on the projector.

Important

■ If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, check that the Video source device is turned on and operating correctly. Also check that the signal cables have been connected correctly.

Connecting an S-Video source device

Examine your Video source device to determine if it has an unused S-Video output socket available:

- If so, you can continue with this procedure.
- If not, you will need to reassess which method you can use to connect to the device.

To connect the projector to an S-Video source device:

- Take an S-Video cable and connect one end to the S-Video output socket of the Video source device.
- 2. Connect the other end of the S-Video cable to the **S-VIDEO** socket on the projector.

Important

- If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, check that the Video source device is turned on and operating correctly. Also check that the signal cables have been connected correctly.
- If you have already made a Component Video connection between the projector and this S-Video source device using Component Video connections, you need not connect to this device using an S-Video connection as this makes an unnecessary second connection of poorer picture quality. See "Connecting Video source devices" on page 17 for details.

Connecting a composite Video source device

Examine your Video source device to determine if it has a set of unused composite Video output sockets available:

- If so, you can continue with this procedure.
- If not, you will need to reassess which method you can use to connect to the device.

To connect the projector to a composite Video source device:

- 1. Take a Video cable and connect one end to the composite Video output socket of the Video source device.
- Connect the other end of the Video cable to the VIDEO socket on the projector.

Important

- If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, check that the Video source device is turned on and operating correctly. Also check that the signal cables have been connected correctly.
- You need only connect to this device using a composite Video connection if Component Video and S-Video inputs are unavailable for use. See "Connecting Video source devices" on page 17 for details.

Operation

Powering On/Off the Projector

Powering On the Projector:

- 1. Complete the AC power cord and peripheral signal cable(s) connections.
- 2. Press \circlearrowleft to turn on the projector. The projector takes a minute or so to warm up.
- 3. Turn on your source (computer, notebook, DVD, etc.). The projector automatically detects your source.
 - If you are connecting multiple sources to the projector simultaneously, press SOURCE on the projector or Source on the remote control to select your desired signal or press your desired signal key on the remote control.

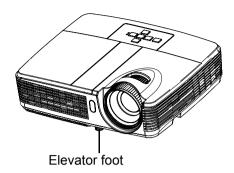

Warning

- Never look into the lens when the lamp is on. This can damage your eyes.
- This focal point concentrates high temperature. Do not place any object near it to avoid possible fire hazard.

Powering Off the Projector:

- 1. Press \circlearrowleft to turn off the projector lamp. You will see a message "Power off? Press Power again" appear on the screen.
- 2. Press \circlearrowleft again to confirm.
 - The cooling fans continue to operate for cooling cycle.
 - When the Power LED becomes steady blue, the projector has entered stand-by mode.
 - If you want to turn the projector back on, you must wait until the projector has completed the cooling cycle and has entered stand-by mode. Once in stand-by mode, simply press to restart the projector.
- 3. Disconnect the AC power cord from the electrical outlet and the projector.
- 4. Do not turn on the projector right after power off.

Adjusting the Projector Height

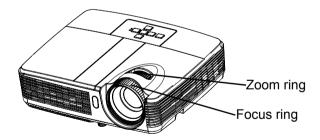

The projector is equipped with an elevator foot to adjust the image height. To raise or lower the image, turn the elevator foot to fine-tune the height.

Note

■ To avoid damaging the projector, make sure that the elevator foot is fully retracted before placing the projector in its carrying case.

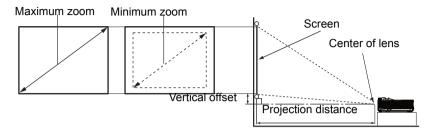

Adjusting the Projector Zoom and Focus

- 1. Focus the image by rotating the focus ring. A still image is recommended for focusing.
- 2. Adjust the image size by rotating the zoom ring.

Adjusting Projection Image Size

Refer to the graphic and table below to determine the screen size and projection distance.

Screen size	4:3 Screen			
Diagonal	Projection distance [inch (m)]		Image height	Vertical
[inch (cm)]	(min. zoom)	(max. zoom)	[inch (cm)]	offset [inch (cm)]
30 (76)	45.3 (1.2)	50.6 (1.3)	18 (45.72)	2.70 (6.86)
60 (152)	92.2 (2.3)	102.9 (2.6)	36 (91.44)	5.40 (13.72)
80 (203)	123.5 (3.1)	137.7 (3.5)	48 (121.92)	7.20 (18.29)
100 (254)	154.8 (3.9)	172.5 (4.4)	60 (152.4)	9.00 (22.86)
150 (381)	233.0 (5.9)	259.6 (6.6)	90 (228.6)	13.50 (34.29)
200 (508)	311.2 (7.9)	346.7 (8.8)	120 (304.8)	18.00 (45.72)
250 (635)	389.4 (9.9)	433.8 (11.0)	150 (381.0)	22.50 (57.15)
300 (762)	467.6 (11.9)	-	180 (457.2)	27.00 (68.58)

- Position the projector in a horizontal position; other positions can cause heat build-up and damage to the projector.
- Keep a space of 30 cm or more between the sides of the projector.
- Do not use the projector in a smoky environment. Smoke residue may build-up on critical parts and damage the projector or its performance.
- Consult with your dealer for special installation such as suspending from a ceiling.

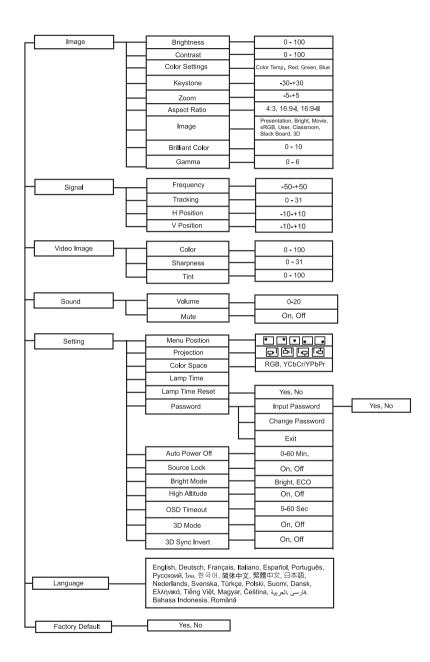

Menu Operation

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings.

How to operate

- Press MENU on the projector or Menu on the remote control to open the OSD menu.
- When OSD is displayed, use ▲/▼ to select any feature in the main menu.
- 3. After selecting the desired main menu item, press ▶ to enter sub-menu for feature setting.
- 4. Use ▲/▼ to select the desired item and adjust the settings with ◄/▶.
- 5. Press **MENU** on the projector or **Menu** on the remote control, the screen will return to the main menu.
- To exit OSD, Press MENU on the projector or Menu on the remote control again. The OSD menu will close and the projector will automatically save the new settings.

Image

Brightness

Brighten or darken the image.

Contrast

Set the difference between light and dark areas.

Color Settings

Adjust the color temperature. At higher temperature the screen looks colder; at lower temperature, the screen looks warmer. If you select "User", then you can change the intensity of each of 3 color (Red, Green, Blue) to customize user color temperature.

Keystone

Manually correct distorted images resulting from an angled projection.

Zoom

Zoom in and out the images.

Aspect Ratio

Use this function to choose your desired aspect ratio.

For SVGA models:

- 4:3 The input source will be scaled to 800 x 600.
- 16:9-I: The input source will be scaled to 800 x 450.
- 16:9-II: The input source will be scaled to 800 x 480 (show 800 x 600).

For XGA models:

- 4:3 The input source will be scaled to 1024 x 768.
- 16:9-I: The input source will be scaled to 1024 x 576.
- 16:9-II: The input source will be scaled to 1024 x 614 (show 1024 x 768).

Image

EN-26

There are many factory presets optimized for various types of images.

- Presentation: For computer or notebook.
- Bright: For bright environment.
- Movie: For home theater.
- sRGB: For PC standard color.
- User: Memorize user's settings.
- Classroom: For projection in the classroom.
- Black Board: For black projection screen type.
- 3D: For viewing 3D videos.

Brilliant Color

Adjusts the Brilliant Color value to extend the exposure range and sharpens detail for grain free images.

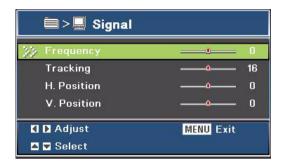

Gamma

Effect the represent of dark scenery. With greater gamma value, dark scenery will look brighter.

Note

■ When Economic Standby (<1W), VGA and audio loop through will not work in standby mode.

Signal

Frequency

Adjust the timing of the projector relative to the computer.

Tracking

Adjust the phase of the projector relative to the computer.

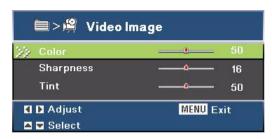

H Position (Horizontal Position)

Adjust the image left or right within the projection area.

V Position (Vertical Position)

Adjust the image up or down within the projection area.

Video Image

Color

Adjust a video image from black and white to fully saturated color.

Sharpness

Sharpen or soften the image.

Tint

Shift colors toward red or green.

Sound

Volume

Adjust the volume level.

Mute

Cut off the sound temporarily.

Setting

Menu Position

Choose the menu location on the display screen.

Projection

Adjust the picture to match the orientation of the projector: upright or upsidedown, in front of or behind the screen. Invert or reverse the image accordingly.

Color Space

Select an appropriate color matrix type from RGB,YCbCr/YPbPr.

Lamp Time

Display the lamp's elapsed operating time (in hours).

Lamp Time Reset

Reset the lamp Hour to 0 hours.

Password

Set or change the password. When the password function is added, image projection will require to input the preset password when turning on the projector. Pass-code default value is "Right-Left-Down-Up" (first time).

Auto Power Off

Set the countdown timer interval. The countdown timer will start, when there is no signal being sent to the projector. Then projector will automatically power off when the countdown has finished (in minutes).

FN-30

Source Lock

- On: The projector will search specified connection port.
- Off: The projector will search for other signals if the current input signal is lost.

Bright Mode

- ECO: Choose "ECO" to dim the projector lamp which will lower power consumption and extend the lamp life by up to 120%.
- Bright: Choose "Bright" to increase the brightness.

High Altitude

Use this function to allow the fans operates at full speed continuously to achieve proper high altitude cooling of the projector.

OSD Timeout

Duration of OSD menu display countly starts (at idle state by second).

3D Mode

- On: Enable 3D Mode function.
- Off: Disable 3D Mode function.

When 3D Sync is set to "On", the settings for input source or broadcast device are required as below:

- 1. For S-VIDEO and VIDEO input source, signal type should be NTSC (60).
- For computer input source, the hardware and software requirements should be Windows 7 operating system, 3D videos and professional 3D video player softwares. Computer's output frequency should be 120Hz and display card should be higher than NVIDIA 9800.

3D Sync Invert

- On: Invert left and right frame contents.
- Off: Default frame contents.

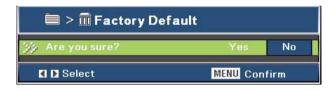

Language

Select the language used by the on-screen menu.

Factory Default

Restore settings to factory default.

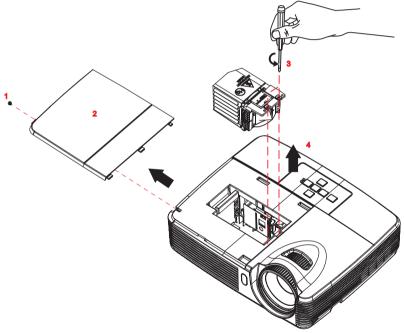

Appendix

Replacing the Lamp

As the projector operates over time, the brightness of the projector lamp gradually decreases and the lamp becomes more susceptible to breakage. We recommend replacing the lamp if a warning message is displayed. Do not attempt to replace the lamp yourself. Contact the qualified service personnel for replacement.

- The lamp is extremely hot right after turning off the projector. If you touch the lamp, you may scald your finger. When you replace the lamp, wait for at least 45 minutes for the lamp to cool down.
- Do not touch the lamp glass at any time. The lamp may explode due to improper handling, including the touching of the lamp glass.
- Lamp lifetime may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same lifetime for each lamp. Some lamps may fail or terminate their lifetime in a shorter period of time than other similar lamps.
- A lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.
- Wear protective gloves and eyeglasses when fixing or detaching the lamp.
- Faster on-off-cycles will damage the lamp and reduce lamp life. Wait at least for 5 minutes to turn off the projector after powering on.
- Do not operate the lamp in proximity to paper, cloth, or other combustible material nor cover it with such materials.
- Do not operate the lamp in an atmosphere containing an inflammable substance, such as thinner.
- Thoroughly ventilate the area or the room when operating the lamp in an oxygen atmosphere (in the air). If ozone is inhaled, it could cause headaches, nausea, dizziness, and other symptoms.
- The inorganic mercury is involved in the lamp. If the lamp bursts, the mercury inside the lamp will be exposed. Leave the area immediately if the lamp shatters while being operated and ventilate the area for at least 30 minutes in order to avoid the inhalation of mercury fumes. Otherwise it could be harmful to user's health.

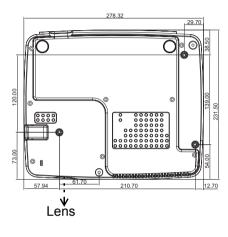

- 1. Turn off the projector.
- 2. If the projector is installed in a ceiling mount, remove it
- 3. Unplug the power cord.
- 4. Remove the screw in the side of the lamp cover. 1
- Remove the cover. 2
- 6. Loosen the screws from the lamp module. 3
- 7. Raise the handle, and lift out the module. 4
- 8. Insert the new lamp module into the projector and tighten the screws.
- 9. Replace the lamp cover and tighten the screw.
- 10. Turn on the projector. If the lamp does not turn on after the warm-up period, try reinstalling the lamp.
- 11. Reset the lamp hour. Refer to the "Setting > Lamp Time Reset" menu.

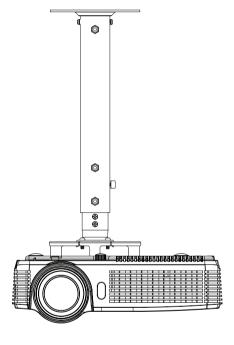

- Dispose the used lamp according to local regulations.
- Ensure that screws are tightened properly. Screws not tightened fully may result in injury or accidents.
- Since the lamp is made of glass, do not drop the unit and do not scratch the glass.
- Do not reuse the old lamp. This could cause the lamp to explode.
- Be sure to turn off the projector and unplug the AC power cord before replacing the lamp.
- Do not use the projector with the lamp cover removed.

Ceiling mount installation

- To prevent damage to your projector, please use the Optoma ceiling mount.
- 2. If you wish to use a third party ceiling mount kit, please ensure the screws used to attach a mount to the projector meet the following specifications:
- Screw type: M4*3
- Maximum screw length: 8mm
- Minimum screw length: 6mm

Unit: mm

Note

Please note that damage resulting from incorrect installation will void the warranty.

Warning

- 1.If you buy a ceiling mount from another company, please be sure to use the correct screw size. Screw size will vary depending on the thickness of the mounting plate.
- 2.Be sure to keep at least 10 cm gap between the ceiling and the bottom of the projector.
- 3. Avoid installing the projector near a heat source.

Compatibility Modes

Computer:

Mode	Resolution	H-Sync [KHz]	V-Sync [Hz]
	640 x 350	31.5	70
	640 x 350	37.9	85
	720 x 350	31.5	70
	640 x 400	31.5	70
	640 x 400	37.9	85.1
	720 x 400	31.5	70
	720 x 400	37.9	85
	720 x 576	-	50
	720 x 576	-	60

RS232 Protocol Function List

Baud Rate: 9600 XX=01-99, projector's ID, Data Bits: 8 XX=00 is for all projectors

Parity: None Stop Bits: 1

Flow Control: None

UART16550 FIFO: Disable Projector Return (Pass): P Projector Return (Fail): F

Note

■ There is a <CR> after all ASCII commands.

OD is the HEX code for <CR> in ASCII code.

Troubleshooting

Refer to the symptoms and measures listed below before sending the projector for repairs. If the problem persists, contact your local reseller or service center. Please refer to "LED Indicator Messages" as well.

Start-up problems

If no lights turn on:

- Be sure that the power cord is securely connected to the projector and the other end is plugged into an outlet with power.
- Press the power button again.
- Unplug the power cord and wait for a short while, then plug it in and press the power button again.

Image problems

If the searching source is displayed:

- Press SOURCE on the projector or Source on the remote control to select an active input source.
- Be sure the external source is turned on and connected.
- For a computer connection, ensure your notebook computer's external video port is turned on. Refer to the computer manual.

If the image is out of focus:

- While displaying the on-screen menu, adjust the focus ring. (The image size should not change; if it does, you are adjusting the zoom, not the focus.)
- Check the projection lens to see if it needs cleaning.

If the image is flickering or unstable for a computer connection:

Press MENU on the projector or Menu on the remote control, go to Signal and adjust Frequency or Tracking.

Remote control problems

If the remote control does not operate:

- Be sure nothing is blocking the remote control receiver on the front of the projector. Use the remote control within the effective range.
- Aim the remote control at the screen or at the front of the projector.
- Move the remote control so it is more directly in front of the projector and not as far to the side.

LED Indicator Messages

Projector Status	POWER	TEMP	LAMP
Standby mode	Blue solid	Off	Off
Normal running mode	Flashing 30 seconds after powering on and then become solid blue	Off	Off
Normal cooling	Blue solid	Blue solid	Red solid
Lamp ignition failed	Blue solid	Off	Red flashing
Lamp life end	Blue solid	Off	Red solid
Temp error	Blue solid	Blue flashing	Off
Fan error	Blue solid	Blue solid	Off
Color wheel or DMD error	Blue flashing	Blue flashing	Red flashing

Regulation & Safety Notices

This appendix lists the general notices of your projector.

FCC Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, detectable by turning the equipment in question off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the distance between the equipment and the receiver
- Connect the equipment to an outlet on a different circuit than that which the receiver is connected to
- Or consult the dealer or an experienced radio/TV technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

Remarque a l°¶intention des utilisateurs canadiens

Cet appareil numerique de la classe B est conforme a la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

- EMC Directive 2004/108/EC (including amendments)
- Low Voltage Directive 2006/95/EC
- R & TTE Directive 1999/5/EC (if product has RF function)

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.

Remote Control

Power

Turn the projector on or off.

L Button

Perform the left button of the mouse.

R Button

Perform the right button of the mouse.

Page +

Perform page up function.

Page -

Perform page down function.

Enter/←//Help?

← Confirm your item selection.

? Open the Help Menu.

Source

Switch between input signals.

Re-SYNC

Automatically synchronize the projector to the input source.

Four directional buttons

Use four directional buttons to select items or make adjustments to your selection.

Keystone+/-

Manually correct distorted images resulting from an angled projection.

Volume+/-

Adjust the volume level.

Brightness

Display the setting bar for adjustment of brightness.

3D

Turn on or off 3D function.

Menu

Display on-screen display menus.

HDMI

Display HDMI signal.

(This function will not work if product does not have HDMI)

Freeze

Freeze the projected image.

AV mute

Cut off the AV Mute temporarily. Only pressing AV Mute again can output sound and image. If any other buttons are pressed, the projection image will become abnormal and no sound will be output.

S-Video

Display S-Video signal.

VGA

Switch input source to VGA1 or VGA2 by sequence.

Video

Display video signal.
